

Contents + Quick guide SMD training kit for hand soldering: 110 pcs

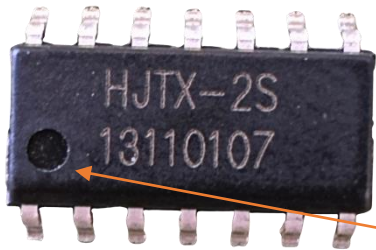

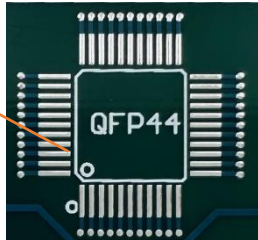

General disclaimer:

The value of the components in your package might be different than the ones in the pictures. The purpose of this kit is to practice SMD soldering so the value doesn't matter, only the size is important. How many resistors, capacitors or LEDs you get can also vary because spares are supplied but it will always be the minimum indicated in this document.

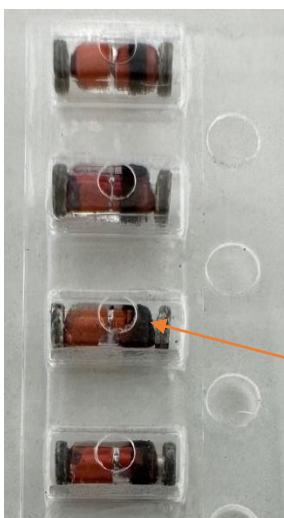

2x QFP44

Pay attention to the orientation:

2x SO-14 amplifier ICs

Pay attention to the orientation:

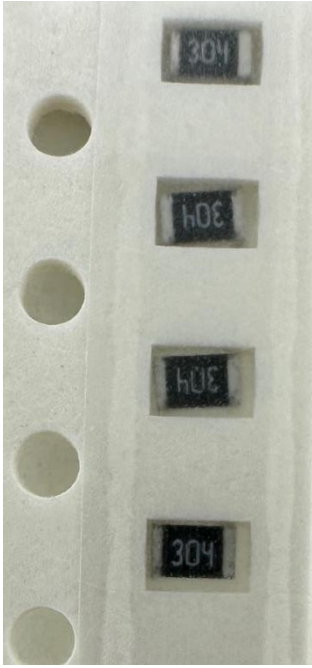

10x diode

Pay attention to the orientation:

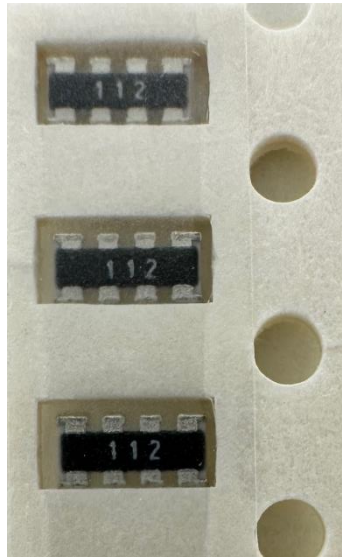

6x SOT-23 transistor

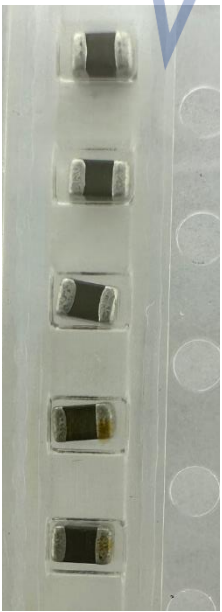

20x 0805 size resistor

6x 0603 size resistor pack

ELEGOOP

20x 0805 size capacitor

34x 0603 size resistor

10x 0402 size resistor

1x PCB
