

# EMC risk scan

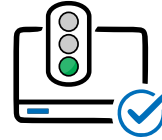

Will your electronics design pass the EMC test?

Email the PCB design

Receive the EMC risk assessment within 3 business days

Know whether the design is ready for the EMC test

## Certainty

### PCB validation

- Go into the EMC test with confidence
- Final check that improvements are correctly implemented
- Ensures implementation errors don't lead to failed tests

2k - 4k €

## Improvement

### PCB design audit

- Improves the EMC behaviour of the design
- Layout feedback down to component and trace level
- Concrete improvement points with applicable EMC explanation

1k - 2k €

## Insight

### EMC risk scan

- Insight into the EMC risks of the PCB design
- EMC feedback without measurement
- Know where improvements have the most effect
